Features & functions:
- 2402-2480MHz (5m working distance/unblocked)
- 48 Channel Frequency Hopping (FHSS)
- 1.5V, low 20mA power efficient
- 1x AAA/LR03 battery
- state-of-the-art low-powered laser technology
- 1600/1200/800 dpi selectable
- 8 minute idle auto sleep (any button wake up)
- *battery low-power indicator; blinking red light between gap of centre button & mouse(M)(see page 2).*

Charging and maintenance of battery:
- switch off mouse with (F) if not using for long a time.
- when battery is flat, connect the charging cable as shown below for charging. Mouse can be used while the battery is charging. *Switch (F) to "On" for charging.*
- charge 16 hours before first use.
- 6-8 hours for full charge.

to USB port of PC or **McKAL** MM611/MM711 for charging of battery

*Extend retractable cable to use mouse while charging. **USB** RECEIVER NEEDS TO BE **CONNECTED** TO PC FOR MOUSE OPERATION, EVEN WHILE CHARGING.*

Mouse/USB receiver re-sync

McKAL coupé employs the latest auto-scan 48-channel FHSS technology that does not require sync between USB receiver and mouse in normal usage. In the unlikely event of requiring to re-sync:
(1) Reconnect USB receiver to PC USB port.
(2) Press and hold right button together with centre button(scroll) for 15 seconds.
(3) Release and the mouse is ready to use.
